Server Performance Dashboard

Unique data, analysis and insights
on IT server performance

DRIVE REVENUE, DELIVER CUSTOMER VALUE AND CREATE PIPELINE AND PROJECTS WITH OUR PERFORMANCE INSIGHTS SOFTWARE

Interact delivers seamless visibility into your customers infrastructure with zero friction. Our dashboard turns raw IT data into intuitive visuals and enables you to deliver smart recommendations for your customers and prospects. **Give your teams the tools to act, not just observe.**

WORLD-LEADING SERVER EFFICIENCY

Leverage Interact's world-leading server efficiency models to gain deep insights into your customers hardware's performance without needing to run expensive benchmarks or schedule downtime.

- **Fully automated modelling from server hardware specifications**
- **Consistent IT efficiency ratings at both server and data centre levels**
- **Understand where compute power lives and how effectively it's used**

EMPOWER TEAMS WITH ACTIONABLE INSIGHTS

Drive revenue for your teams and save your customers money and power by providing a value-added service with never before seen hardware insights.

- **Spot underutilised or inefficient hardware at a glance**
- **Retire or redeploy servers based on actual performance**
- **Migrate workloads to maximise energy efficiency and performance**

EXPERTISE YOU CAN DEPEND ON

The Interact team brings global expertise across:

- **Sustainability strategy & compliance** (CSRD, EED, ISO/IEC, GHG Protocol)
- **IT hardware optimisation** for peak performance and efficiency
- **IT lifecycle and asset management** to extend product life and reduce waste
- **Circular economy solutions** to minimise environmental impact

GET IN TOUCH

We've helped 100s of organisations reduce energy consumption, decrease procurement and IT management costs while meeting and exceeding sustainability and environmental targets for reduction.
